

SCAN-3C for AUDITORY PROCESSING

This SCAN-3C for AUDITORY PROCESSING graph demonstrates the:

- **AVERAGE GROUP IMPROVEMENT** measured as a **PERCENTILE.**
- **The average improvement of the GROUP was 27 percentile points after 20 weeks on the *Ready4SUCCESS* program.**

AUDITORY PROCESSING is “what we do with what we hear” (Katz, Stecker & Henderson, 1992). When auditory signals are received, a person must attend to, analyse, store, and retrieve information related to the signals.
